<sup>&</sup>lt;sup>5</sup> Available operating frequency may vary depending on the limitaion of the countries or regions in which the device is used.

<sup>&</sup>lt;sup>6</sup> Maximum wireless transmission rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless transmission rate will vary as a result of:
1) environmental factors, including building materials, physical objects and obstacles,

<sup>2)</sup> network conditions, including local interference, volume and density of traffic, product location, network complexity, and network overhead and

<sup>3)</sup> client limitations, including rated performance, location, connection quality, and client condition.

<sup>&</sup>lt;sup>7</sup> Maximum transmit power is limited by local regulatory settings.
